Pearson

1. Find the first 4 terms of the binomial expansion, in ascending powers of x , of

$$(8 + 32x)^{\frac{1}{3}} \quad |x| < \frac{1}{4}$$

giving each term in simplest form.

(4)

(Total for Question 1 is 4 marks)

2. Given that

$$\frac{2x^2 - x + 11}{(x + 2)(2x - 3)} \equiv A + \frac{B}{x + 2} + \frac{C}{2x - 3}$$

- (a) find the value of each of the constants A , B and C .

(4)

- (b) Hence find

$$\int \frac{2x^2 - x + 11}{(x + 2)(2x - 3)} dx$$

(3)

(Total for Question 2 is 7 marks)

3. A solid metal cube is being heated and is expanding.

The volume of the cube is increasing at a constant rate of $0.085 \text{ cm}^3 \text{ s}^{-1}$

At time t seconds,

- the side length of the cube is $x \text{ cm}$
- the volume of the cube is $V \text{ cm}^3$

At the instant the volume of the cube is 100 cm^3 , the side length is increasing at a rate of $k \text{ cm s}^{-1}$

Find the value of k , giving your answer to 3 significant figures.

(4)

(Total for Question 3 is 4 marks)

4. The curve C has parametric equations

$$x = \frac{3}{5t-2} \quad y = \frac{t}{4-t} \quad t \in \mathbb{R} \quad t \neq \frac{2}{5} \quad t \neq 4$$

- (a) Show that the Cartesian equation of C is

$$y = \frac{ax+b}{cx+d} \quad x \neq -\frac{d}{c}$$

where a , b , c and d are integers to be found.

(3)

The line l has equation $y = -x + 1$

- (b) Use algebra to prove by contradiction that l and C do not intersect.

(4)

(Total for Question 4 is 7 marks)

5. Use the substitution $u = \sqrt{2x-1}$ to show that

$$\int \frac{x}{\sqrt{2x-1}} dx = A(2x-1)^{\frac{1}{2}}(x+B) + k$$

where A and B are constants to be found, and k is an arbitrary constant.

(5)

(Total for Question 5 is 5 marks)

6. **In this question you must show all stages of your working.
Solutions relying entirely on calculator technology are not acceptable.**

The curve C has equation

$$x^2 - xy + y^2 + 4x = 12$$

- (a) Find $\frac{dy}{dx}$ in terms of x and y .

(4)

Given that the point $P(-4, -6)$ lies on C ,

- (b) find the equation of the normal to C at P , giving the answer in the form $y = mx + c$ where m and c are constants.

(3)

The normal to C at P intersects C again at the point Q .

- (c) Find the exact coordinates of Q .

(3)

(Total for Question 6 is 10 marks)

7. Relative to a fixed origin O

- the point A has position vector $5\mathbf{i} - 3\mathbf{j} + \mathbf{k}$
- the point B has position vector $3\mathbf{i} - 2\mathbf{j} + 3\mathbf{k}$
- the point C has position vector $\alpha\mathbf{i} + \beta\mathbf{j} - 5\mathbf{k}$

where α and β are constants.

The straight line l passes through A and B .

- (a) Find a vector equation for l . (2)

Given that C lies on l

- (b) find the value of α and the value of β . (2)

- (c) Find, in degrees to one decimal place, the acute angle between OC and AB . (3)

The point D lies on l such that OD is perpendicular to l .

- (d) Find the exact coordinates of D . (3)

(Total for Question 7 is 10 marks)

8. (a) Use integration to show that

$$\int x \cos 2x \, dx = Ax \sin 2x + B \cos 2x + c$$

where A and B are constants to be found, and c is an arbitrary constant.

(3)

Figure 1

Figure 1 shows a sketch of part of the curve with equation

$$y = 4x + 3 \cos 2x$$

The finite region R , shown shaded in Figure 1, is bounded by the curve, the line

with equation $x = \frac{\pi}{2}$, the x -axis and the line with equation $x = \frac{\pi}{4}$

The region R is rotated through 2π radians about the x -axis to form a solid of revolution S .

(b) Use algebraic integration to find the exact volume of S , giving the answer in the form

$$\pi(p\pi^3 + q\pi + r)$$

where p , q and r are constants.

(6)

(Total for Question 8 is 9 marks)

9. **In this question you must show all stages of your working.**
Solutions relying entirely on calculator technology are not acceptable.

A drink is put in a freezer to cool.

The temperature, $\theta^\circ\text{C}$, of the drink, t minutes after it is put in the freezer, is modelled by the differential equation

$$\frac{d\theta}{dt} = -k(\theta + 15)$$

where k is a positive constant.

Given that the temperature of the drink when it was put in the freezer was 21°C ,

- (a) solve the differential equation to show that, according to the model,

$$\theta = Ae^{-kt} + B$$

where A and B are integers to be found.

(5)

Given that 20 minutes after the drink is put in the freezer, its temperature is 12.9°C ,

- (b) find the value of k , giving the answer to 3 significant figures.

(2)

- (c) Hence find, according to the model, the temperature of the drink, one hour after it was put in the freezer. Give the answer to one decimal place.

(2)

(Total for Question 9 is 9 marks)

10.

Figure 2

**In this question you must show all stages of your working.
Solutions relying entirely on calculator technology are not acceptable.**

Figure 2 shows a sketch of the curve C with parametric equations

$$x = 8 \cos \theta \quad y = 5 \sin 2\theta \quad 0 \leq \theta \leq \frac{\pi}{2}$$

The point P with parameter $\theta = \frac{\pi}{3}$ lies on C .

The line l is the normal to C at P , as shown in Figure 2.

(a) Use calculus to show that l has equation

$$y = p\sqrt{3}x + q\sqrt{3}$$

where p and q are rational constants to be found.

(4)

The finite region R , shown shaded in Figure 2, is bounded by C , l and the x -axis.

(b) Using algebraic integration, find the exact area of R , giving the answer in the form $A + B\sqrt{3}$ where A and B are rational constants.

(6)

(Total for Question 10 is 10 marks)

Answer Book

You must have:
 Question paper (sent separately)
 Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear.
Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.
